

# PROFESSIONAL DEEP CLEANING PERFORMANCE

WORKS FOR ME

THE PREMIUM SEBO PROFESSIONAL D9 BARREL

Included Onboard  
Tools

Made in Germany, the premium SEBO PROFESSIONAL D9 barrel vacuum cleaner impresses with its high-quality filtration, AIRBELT™ bumper protection, on-board accessory tools and deep cleaning SEBO ET-1 Powerhead. The D9 ensures thorough cleaning of hard and soft textile floor coverings.

# D9 PROFESSIONAL

# SEBO PROFESSIONAL D9

## THE PROFESSIONAL VACUUM CLEANER FOR THOROUGH CARPET CLEANING.

The powerful SEBO PROFESSIONAL D9 ensures deep fibre cleaning of soft textile floor coverings. Four 360° movable castors ensure a high level of tipping resistance and allows the unit to glide smoothly and safely over the ground, even when cornering. The optimised airways and the conical hose ensure constant and powerful suction power controlled at your finger-tips. With its high product quality, SEBO D9 is reliable and gets the job done right every time.

### 01 Unique Airbelt™

The AIRBELT™ serves as impact protection to prevent incidental damage to walls and furniture. At the same time, the filtered air exits quietly through the bumper.

### 02 SEBO ET electric power brush

The electric power brush is ideal for the thorough and gentle cleaning of soft textile floor coverings such as carpet and rugs. The 4-level manual height adjustment can be easily adjusted to different carpet piles and heights. The brush roller can be cleaned and changed without tools.

### 03 Integrated accessories

For special cleaning tasks, the crevice nozzle, upholstery nozzle and dusting brush are integrated into the SEBO PROFESSIONAL D9 to save time. This means they are ready for use at any time and can be easily removed with one hand.

### 04 SEBO S-Class filtration

Improve indoor air quality through the 3 filtration stages that capture 99.97% of dust and allergen particles sizes down to 0.3 microns. All filters are made of high-quality electret material which allow constant airflow.

### 05 Variable power at your fingertips

The variable power of the SEBO D9 can be conveniently controlled at the operating handle. For cleaning hard floor areas the electric power brush can be *switched off* on the handle for suction-only vacuuming.

### 06 Large operating radius

Thanks to the long cable, hose and wand the SEBO D9 cleans large areas quickly without having to constantly change power points. The cable can be quickly rewound at the push of a button.

#### Product features

- Deep fibre cleaning with a professional powerhead.
- More suction power with an optimised air path.
- High filtration for improved indoor air quality.
- Greater mobility from large operating radius.
- Cost saving large volume debris bag.
- Fingertip variable power control.
- Automatic cable winding.
- High quality stainless steel electric telescopic tube.
- Three integrated additional nozzles for special tasks.
